

ZOYA SAYEEDA AHMED

ARTIFICIAL INTELLIGENCE STUDENT - UI-UX / WEB DEVELOPER PROFILE

+91 9380428285 | Zoyasayeedaahmed05@gmail.com | linkedin.com/in/zoya-sayeeda-709389340 | Bangalore, India

PROFESSIONAL SUMMARY

Creative and technical 3rd-year Engineering student specializing in user experience mapping, full-scale portal structuring, and frontend presentation tools. Award-winning hackathon designer with hands-on experience translating complex programmatic user profiles into interactive digital wireframes and seamless layouts. Eager to bring high design-system viability, HTML structure knowledge, and rapid prototyping to Nuhvin Global Services as a UI-UX / Web Developer.

TECHNICAL SKILLS

Design & Web:	Figma (Digital Prototyping, Wireframing, Layout Mapping), Design Systems, Interactive Pathways, HTML, CSS Fundamentals
Languages/Data:	Python, SQL, HTML, NumPy, Pandas, Scikit-Learn
Tools & Libs:	OpenCV, MediaPipe, Git, GitHub
Competencies:	Human-Centric Problem Solving, Interface Viability, Cross-functional Design Collaboration, Execution Speed

WORK EXPERIENCE

Freelance UI/UX & Web Developer	Megaminds IT Services
- Designed and engineered a high-converting landing website tailored to corporate branding and operational objectives. - Translated client requirements into interactive, high-fidelity Figma prototypes to refine user journeys and layout structures. - Collaborated closely to ensure responsive design execution, optimized navigation pathways, and consistent asset styling.	

TECHNICAL & AUTONOMOUS PROJECTS

OPPORTUNE - Technical Internship Discovery Platform	Hackathon Winner
- Designed and structured a full-scale portal allowing university students to efficiently map and search technical internship tracks. - Created interactive system pathways and digital layout prototypes using Figma to map user profiles cleanly against career listings. - Awarded the top cash prize at a competitive regional Hackathon for superior UI design system execution and project viability.	
Smart Alert System for Night Truck Drivers	
- Deployed a real-time computer vision system using OpenCV and MediaPipe facial landmark nodes to track driver attentiveness. - Programmed custom mathematical algorithms calculating eye closure duration rates to identify early-onset fatigue. - Engineered low-latency communication mechanisms to prompt immediate warnings, ensuring high system reliability and safety.	

CERTIFICATIONS & ACHIEVEMENTS

- Hackathon Winner (1st Place):** Top cash prize for "Opportune" based on outstanding innovation and layout speed.
- IBM Certification:** Enterprise Design Thinking Practitioner mastering frameworks for human-centric complex problem-solving.
- AI Beyond Coding Certification:** Completed intensive operational workshop executing practical, non-syntax AI model deployment.
- FreeCodeCamp Certification:** Basic Python Programming, verifying competence across core algorithms and data structures.
- Organizing Committee Lead:** Successfully structured a regional 24-hour engineering hackathon managing pipelines for 50+ teams.

EDUCATION

Bachelor of Engineering: Artificial Intelligence & Machine Learning	08/2023 - 05/2027
Ghousia College of Engineering - Bangalore, India	
Pre-University Course	08/2021 - 05/2022
Holy Spirit College - India
